USB: no more deaths at work - no more workers’ blood for the profits

Nazionale, 30/05/2023

One worker lost his life and two were seriously injured and are hospitalised at the shipyards in Perama, Greece.

USB expresses its condolences to the family and workers and its anger at yet another work-related murder. Fruit of the continuous search for maximum profit at the expense of workers' health and safety.

The deaths and injuries in the workplace are constantly increasing, it is a massacre, a war against workers.

We support the struggles that will be carried out in Greece by the workers and PAME.

In immediate response, a 24-hour strike is being held today, May 30, by metalworkers following the decision by the Attica Metal and Shipbuilding Industry Union.

No more workers'blood for profits
