USB sustains general strike on January 30th in South Basque Country.

Nazionale, 13/01/2020

We express full solidarity to LAB trade union and the people and workers for the next general strike, which has been called by the Social Rights Movement of the Basque Country.

The strike is to defend the pensions and salaries, to ask a minimum decent salary for workers and minimum decent pension for pensioners, for the actual and for the future. With this struggles they ask the recognition of the social rights, currently denied, including the

right to get social housing rents, or the right to respond to all kind of situations of dependency through public, universal and free social services system.

Your situation today is a common situation in many EU countries, we need to fight all together and sustain each other inside our class oriented trade unions family of WFTU.
